Fast, quality mono printing with controlled colour capability

Take the next step with confidence

For those at the threshold between a mono-only past and a colour-capable future. The C5600/C5700 printer combines the best of mono printing with an ability to deliver professional quality colour when needed. And whatever you print, it helps you keep control of usage and costs.

The best-in-class

As well as delivering the fastest mono print in its class, the C5600/C5700 also gives class-leading colour. So with one easy-to-use solution, you can fulfil your need for high volume, low cost, mono printing while giving a real business edge to those documents that need it. And you can do it all without losing control of costs. The cost of printing in mono is comparable to mono-only printers, and we provide in-box software, Print Control, to enable you to monitor and manage colour usage costs.

Ready for the step into colour? Need a truly professional, affordable and versatile printer? Trust OKI Printing Solutions - the business printing specialists with a proven colour heritage.

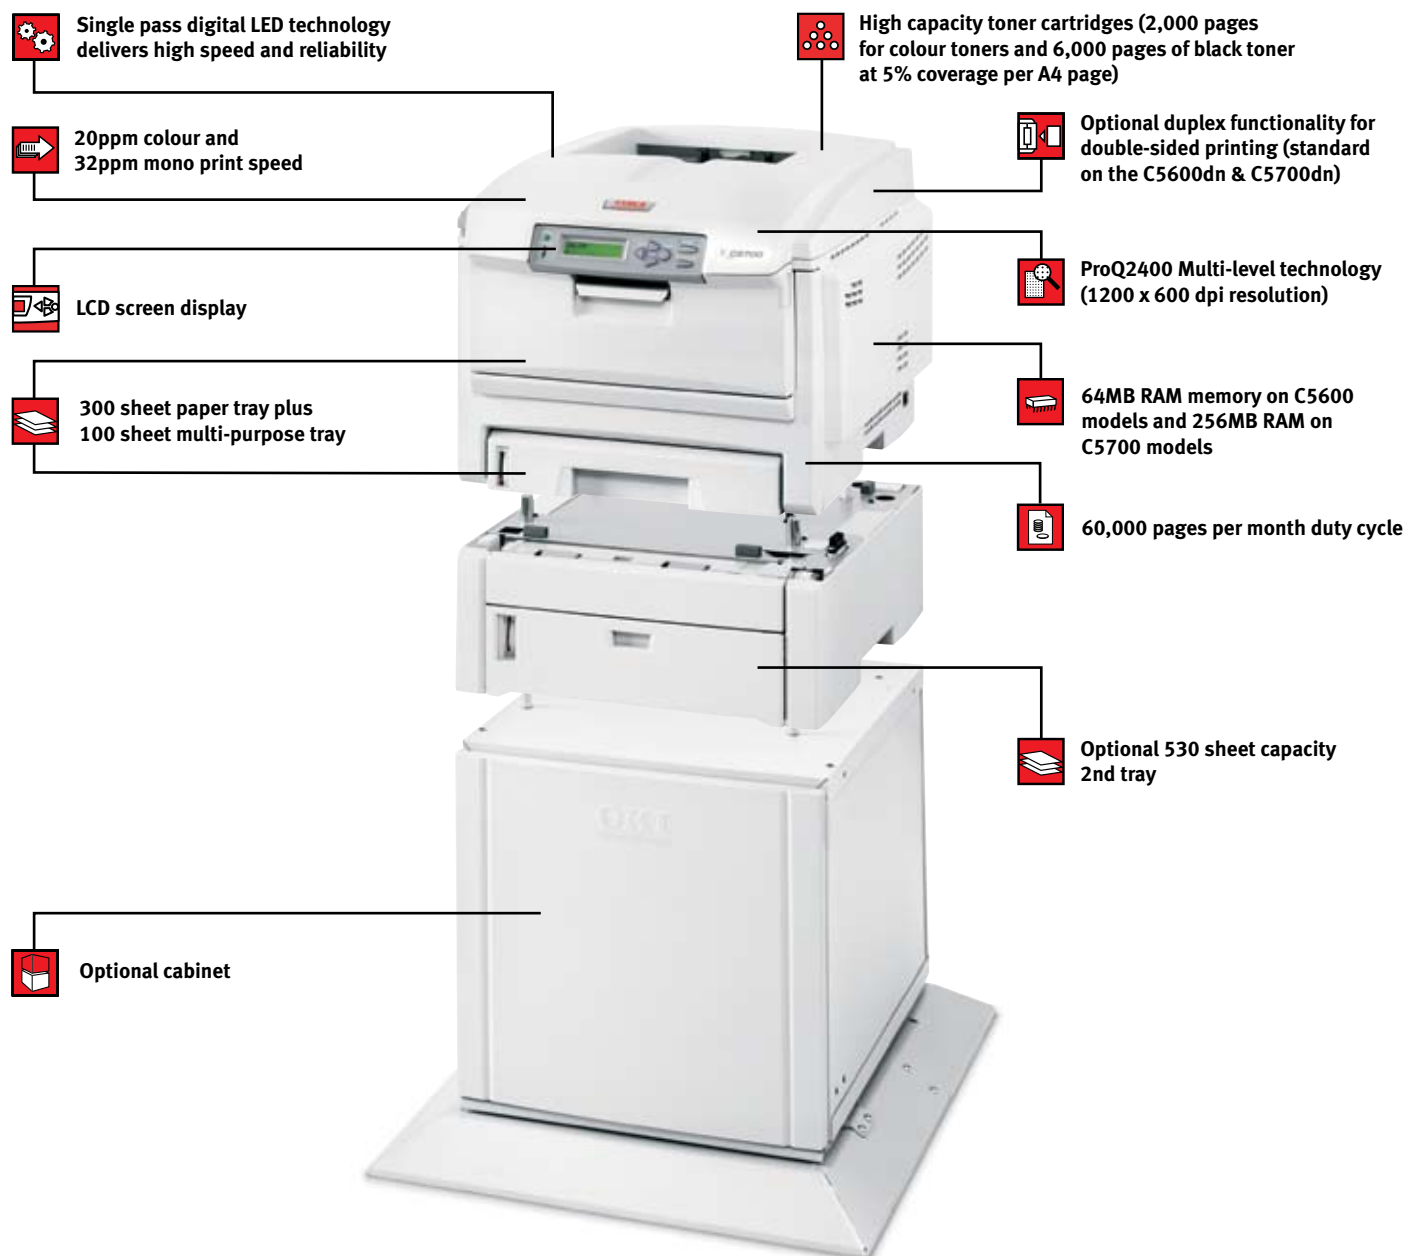

Print Control software allows administrator control and management usage

High volume, low cost, mono printing

For even larger colour volume needs, consider the C5800/C5900 with greater colour speed and lower colour running costs.

Outstanding quality colour on both sides with automatic duplex

Easy printing of address and CD labels and up to 1.2m banners

Fast, flexible and thoroughly efficient

- Class-leading print speeds of 32 pages per minute (ppm) mono and 20 ppm colour.
- Fast time to first print at just 8 seconds for a mono page or 11 seconds for colour.
- Enhanced performance through single-pass Digital LED technology. The straight paper path reduces paper jams and handles a diverse range of media, from business cards to 1.2m banners.
- Input capacity of up to 930 sheets reduces the need for intervention.
- Automatic duplex printing available for professional double-sided printing, enabling booklet printing, reduced paper use and space saving.

Outstanding quality print. Low running costs

- ProQ2400 Multi-level technology and High Definition Toner have been developed in unison. Together they give a higher level of detail, greater colour depth, reduced grain and a high gloss feel.
- Auto Colour Balance ensures consistent results throughout the life of the printer.
- Photo Enhance provides stunning photo-like quality on ordinary office paper.
- High capacity mono toner cartridges reduce running costs and user intervention. Mono running costs are equivalent to many mono only products.
- Low cost colour toner cartridges.

Unique in-box software lets you take control

- Print Control is a powerful network tool to manage colour usage and costs. It keeps printing logs, automatically calculates printing costs and allows you to limit colour and mono print volumes by individuals or groups.
- PrintSuperVision allows network administrators to remotely monitor all printers on their network and verify toner status.
- Template Manager 2006 helps you professionally design and print on a range of non-standard media – and to do so with ease. It even manages the printer settings automatically. From business cards, to CD labels, address labels and banners up to 1.2 meters.
- Web Print makes printing web-pages easier. It adjusts text and images to fit on the printed page without cutting off information, saving you paper and hassle.
- Ask OKI dedicated online support, accessed easily via the printer driver.
- Plus powerful, professional colour management tools that allow you to accurately adjust and match colours.

Without Photo Enhance

With Photo Enhance

Photo Enhance. Delivering the detail on your screen to the print in your hand.

Photo Enhance is a selectable feature within the driver, which allows you to print clear, sharp, photo-like quality pictures on ordinary office paper.

Why OKI Printing Solutions?

We believe that effective printed communications are fundamental to successful businesses. That's why we focus purely on understanding their diverse printing requirements. Through our considerable technological resources we develop fast, high quality, cost-effective printing solutions that will benefit businesses today and long into the future.

It is the same progressive spirit that drove Kibataro Oki to found Oki Electric in 1881, and which helped his company to become the global, multi-billion euro business that it is today. A business whose people share one single-minded purpose: helping other businesses grow and prosper by enabling them to create the best possible impression with their printed communications.

We led the way in making in-house colour printing fast and affordable. Now OKI Printing Solutions lead the way in making it easy. This means more than providing unique technologies and in-built functions like fast, single-pass colour, double-sided printing, and banner printing: it means making those functions as easy to use as possible – first time, every time. We call this **Chromability™ – in-house colour made easy, only from OKI Printing Solutions**. In short, it's about getting the most from your investment.

Our colour-coded segments are designed to help you save time. When you want to add another printing solution to your business, or check out the latest advances in technology on our website, simply use the colour guide below.

Consumables Information: For the protection of your printer, and in order to ensure that you benefit from its full functionality, this model has been designed to operate only with genuine Oki toner cartridges. These can be identified by the Oki trademark. Any other toner cartridge may not operate at all, even if it is described as "compatible", and if it does work, your printer's performance and print quality may be degraded. Specification subject to change without notice. All trademarks acknowledged.
